Page 15, line 21, INSERT: "We believe that there are potential benefits to TEP and its ratepayers if TEP were to conduct an ANM pilot program in the range of 2 to 4MW. The results of such a pilot program would provide the Commission with valuable information concerning ANM. Governmental entities within TEP's territory have expressed substantial interest in pursuing such an ANM program with TEP. In light of these factors, we shall require TEP to consult with interested governmental entities concerning the implementation of such a pilot and thereafter docket by December 6, 2010 a proposal for such an ANM pilot program for consideration by the Commission no later than the last Open Meeting in 2010."
